Cookie Policy

Our website uses cookies to distinguish you from other users of our website. This helps us to provide you with a good experience when you browse our website and also allows us to improve our site.

Currently we are only using essential cookies to allow you to experience the website fuller. These cookies are integral to the website platform and are GDPR compliant.

We will be implementing cookies in the near future and we will ask for your consent before using them while you're browsing our website.

A cookie is a small file of letters and numbers that we store on your browser or the hard drive of your computer if you agree. Cookies contain information that is transferred to your computer's hard drive.

We will use cookies that are required for the operation of our website and which allow us to recognise and count the number of visitors and to see how visitors move around our website when they are using it. This helps us to improve the way our website works, for example, by ensuring that users are finding what they are looking for easily.

Also, they may be used to track your return visits to the website. They include, for example, details such as your IP address, browser type, referring page and time of visit. If you sign up to receive our marketing communications your name and e-mail address will be stored on the server.

You can block cookies by activating the setting on your browser that allows you to refuse the setting of all or some cookies. However, if you use your browser settings to block all cookies (including essential cookies) you may not be able to access all or parts of our site.
